

EnviroBeads 301 | Fats, Oils & Grease

We are an environmentally conscious business that produces beneficial microbes in a liquid & gel bead application.

Biodyne's patented EnviroBeads allow for a slow release application which is highly effective when used in grease traps and floor drains. In addition our encapsulated technology provides protection against harsh chemicals allowing for more active microbes in your drain or grease trap

Biodyne's beneficial microbes are efficient degraders of fats, oils, proteins and other organic waste.

OUR MICROBES ACT LIKE FACTORIES THAT CONTINUALLY PRODUCE ENZYMES WHICH BREAKS DOWN ORGANIC WASTE INTO HARMLESS ODOURLESS COMPONENTS AND WATER

Dosage :

Grease Trap: 1x250g bag weekly directly into trap.

Floor Drain: 1x250g bag weekly directly into drain.

Other commercial uses :

(i.e guesthouse, factories, office blocks) please contact us for more info.

COMPOSITION :

25 Different strains of free living microbes.

Bacteria:

Degrade fats, carbohydrates, proteins, hydrogen sulphides (odours) and many others.

Fungi:

That has the ability to degrade long chain polysaccharides, liquids and proteins, some in low oxygen environments.

Applications:

Grey water systems, Fat traps, Septic Tanks, Conservancy Tanks, Estate Dams, Wineries, Waste Water Plants and many more.

**ENQUIRIES & SALES PLEASE
CONTACT YOUR SUPPLIER**

STORAGE:

Store in a shaded, cool ventilated area.

Temperature should not exceed 30 °C.

Keep out of direct sunlight.

At room temperature Biodyne should maintain its predicted activity for 6 months
